U. S. Patent and Trademark Office PTO-326 (Rev. 3-97) Serial Number: 09/648,523

Art Unit: 2834

Claims 1, 2, 5-10, 12, 13, 15 and 16 are rejected under **35 USC 102** as anticipated by Kaida (652), Kaida (698), Ogawa or Kitaka for the specific reasons set forth in paper no: 10 (10-15-01).

Claims 3, 4, 11 and 14 are rejected under **35 U.S.C. 102** as anticipated by Kitaka for the reason noted in paper no: 3 (10-15-01).

Applicants argue that the references do not explicitly teach the thickness of each piez electric layer as the same as all others. Applicants also note that although the drawings may appear to show equal thicknesses that drawings are imprecise and no to scale, and should not be relied on for dimensional facts. It is true that the references don't explicitly define the piezo-electric layer thickness and drawings are not expected to be an exact depiction of dimensions., However, it is also clear that the references give no reason why the layers should or would be of different thicknesses. Thus, it is fair and reasonable to assume the layer thickness is meant to be uniform (within manufacturing tolerances) and D1=D2. Theus the claims, structurally, read directly on the cited references.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

Page 3

Art Unit: 2834

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
